

Free iPhone iOS Transcription & Accessibility Apps

eyeHEAR

- What it does: Press and hold on the screen to instantly caption conversations in large, easy-to-read text. You can also manually type when speech isn't available.
- Why it's valuable: Designed specifically for d/Deaf and Hard-of-Hearing users, it's 100% free (no in-app purchases), uses Siri's speech recognition on-device, and respects your privacy—no transcripts or audio are stored remotely.
- Cost: Free
